

First Floor Plan

Flexible Learning Areas

FLAs provide a large open and flexible space to encourage team teaching. This approach allows more opportunities for small group work, one-to-one learning, and modeling during lessons. The co-planning process encourages teachers to bounce ideas of each other in order to deliver a more personalised lesson to cater for the range of learners. In addition, the space allows for activities that are not possible in a fixed furnished classroom and for larger cohort activities.

The Bridge Lounge

This area allows breakout spaces from the adjacent flexible learning areas.

Quiet Study Lounge

During the consultation process, students requested a quiet study area for students in the older grades to use before and after school and during the breaks. A dedicated space was built on the first floor that is housed with bean bags, couches, tables and chairs. This space has proven very popular with our older students wishing to undertake independent study. Custom furniture allow students to work individually or in small groups.

- 1 Plant Deck
- 2 Store
- 3 Void
- 4 Flexible Learning Area
- 5 Bridge Lounge
- 6 Plant Deck
- 7 Lift
- 8 Service
- 9 Quiet Study Lounge
- 10 Data Room
- 11 IT Reception
- 12 IT Work Area
- 13 Office
- 14 Lounge
- 15 Drone Room

Main Stairs

The main stairs are a vertical spine that connect the two levels across the building by providing a focal element which seamlessly connects and organises a network of spaces while promoting the flow for learning and continual movement. Mid landings become a holding point for interaction and engagement.

Lounge

The Lounges are active learning spaces that allow varying modes of learning to take place, from group and collaborative tasks to individual reading and relaxing, there is a space for everyone. They provide breakout spaces to the adjacent Flexible Learning Areas and Quiet Study as well as an Apple-Style IT help area.
